Or Black Leprosy, is a disease which is considered neurable, but it has yielded to the curative properties of Swift's Specific-now known all over the world as S. S. Mrs. Barley, of West Somerville, Mrss., near Boston, was attacked several years ago with this indeous black eruption, and was treated by the best medical talent, who could only say that the disease was a species of LEPROSY and consequently bearable. It is impossible to describe her sufferings. Her body from the crown of her head to the soles of her feet was a mass of decay, the flesh rotting off and leaving great cavities. Her fingers festered and several nails dropped off at one time. Her limbs contracted by the fearful alceration, and for years she did not leave her hed. Her weight was reduced in in 125 to 60 ibs. Some faint idea of her condition can be glean d from the fact that three pounds of Cosmoline or ointment were used per week in dressing her sores Finally the passicians acknowledged their deteat by this Black Wolf, and commended the sufferer to her all-wise Creator.

Her husband hearing wonderful reports of Swift's Specific (S. S. S.), prevailed on her to try it as a last resort. She began its use under protest, but soon found that her system was being relieved of the poison, as the sores assumed a red and healthy color, as though the blood was becoming pure and active. Mrs. Bailey continued the S. S. S. untillast obruary; every sore was healed; she discarded chair and crutches, and was for the first time in 12 years a well woman. Her husband, Mr. C. A. Baiey, is in business at 17% Blackstone Street, Boston, and will take pleasure in giving the details of this wonderful cure. Send to us for Treatise on Blood and Skin Diseaser, mailed free.
